Sport Tunes

Author: GenuiSoft

Version: 1.0

Date: 28 December 2019

Purpose of this documentation

The main purpose of this documentation is to introduce an application synchronise with your Apple device and your Apple Music account, the application Sport Tunes.

Description of functionalities

Sport Tunes allow the users to synchronize your Apple device to determine and retrieve the measurements with your number of steps realize daily , your distance covered in your daily life and your average speed.

The motion sensor functions of Apple in your application work with Core Motion technology to determine your daily physical activity.

In addition, you will be able to play all of the music content provided by Apple from the Apple Music platform.

The only prerequisite will be to have an active Apple Music user account, Apple provides several subscription offers.

Sport Tunes works like a music application similar to iTunes: possibility to consult all the musical content, search your favorite music and artists, add your selections to your favorites.

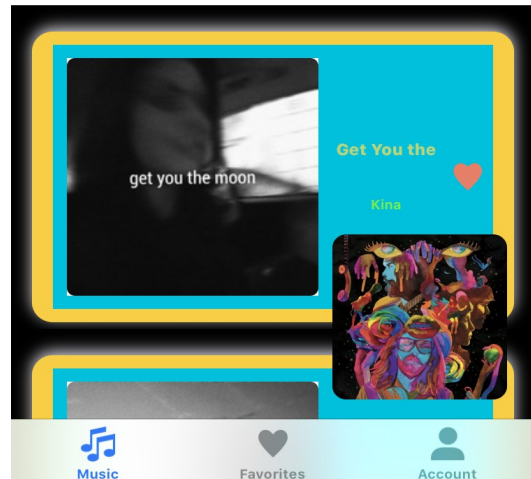

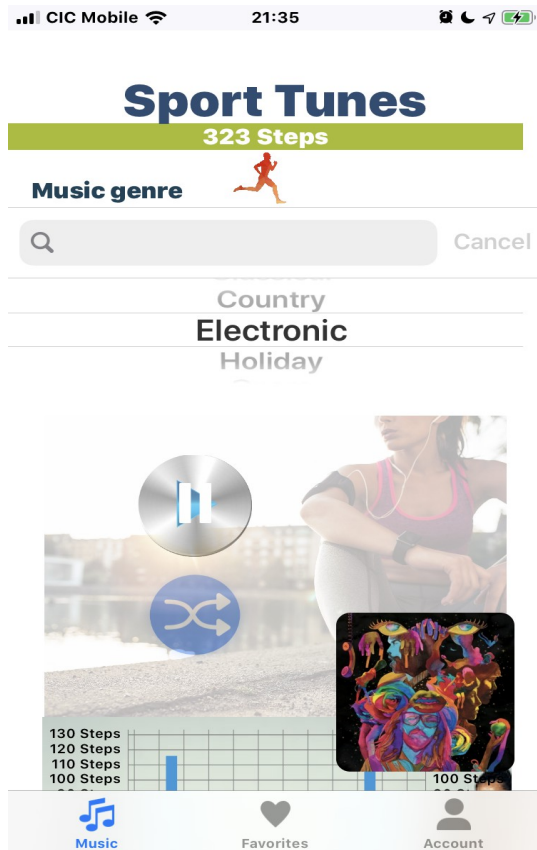

To add to your favorites, Sport Tunes will create a Playlist with the label "Sport Tunes" which will be accessible from your application on iTunes and on any device.

Another important feature, the playback of your music in real time will be synchronized with all of your Apple Devices like the iWatch.

Music playing in real time will be launched in the background on your iPhone or iPad.

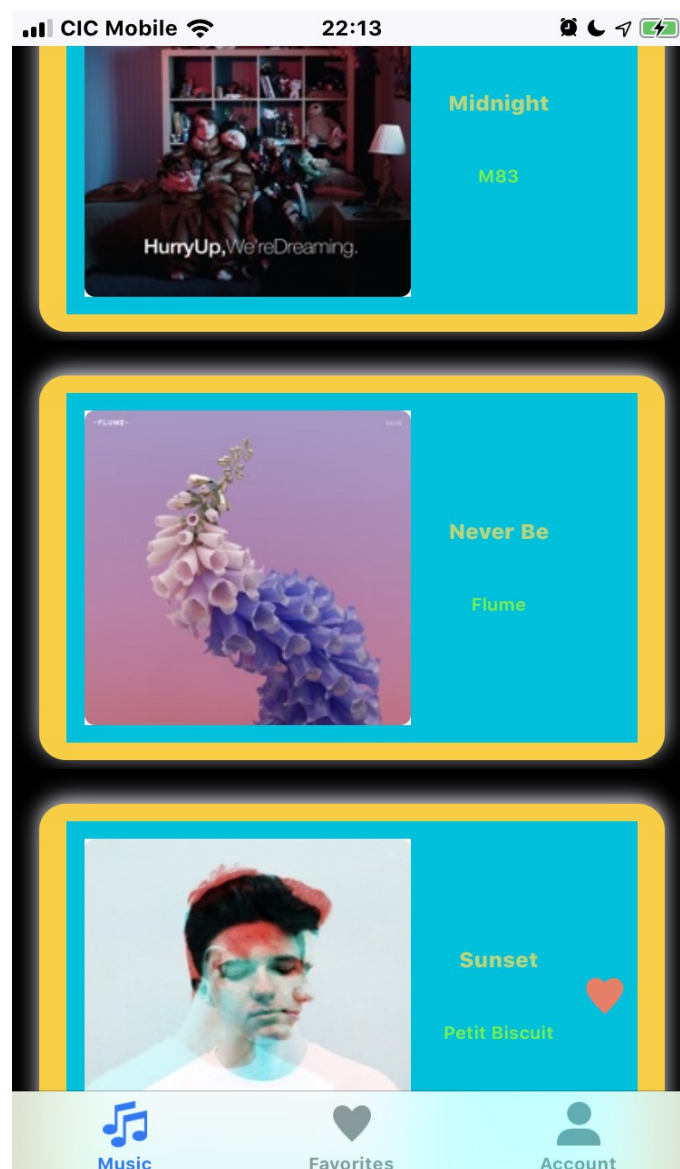

The main functionalities

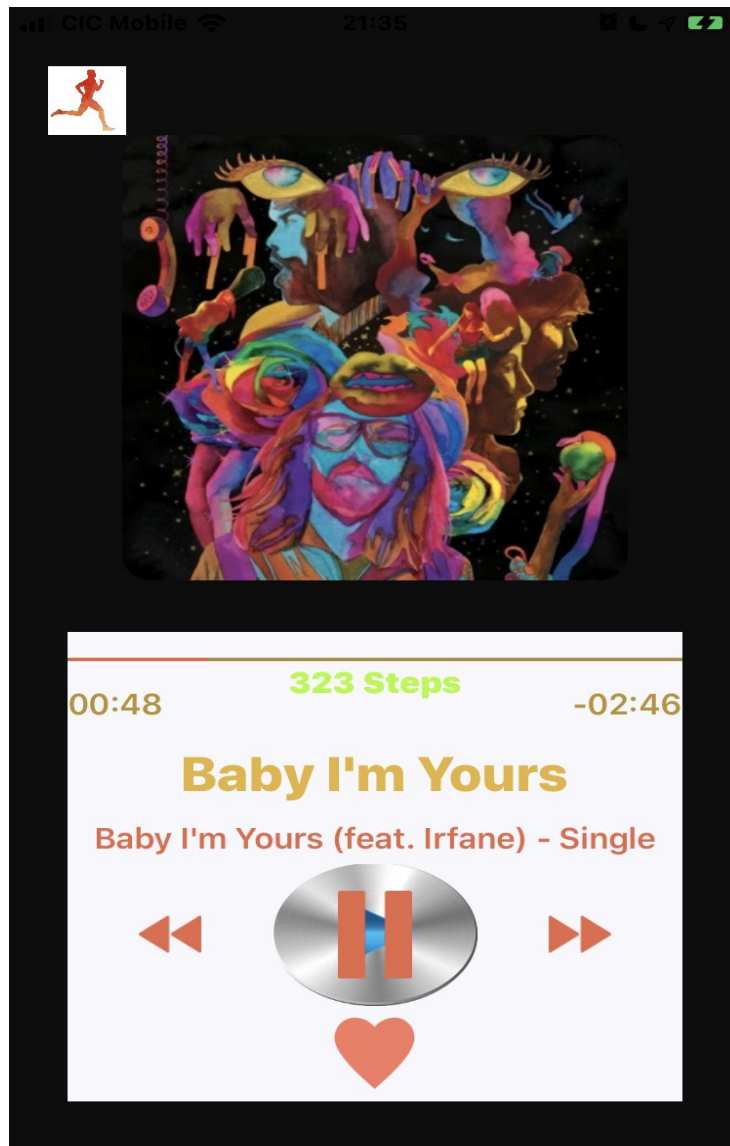

- Music search on Apple Music.
- Continuous / random playback of your favorite music.
- Display a graph of your daily step data.
- Possibility to add your favorite music to your favorites.
- Viewing your favorite playlists.
- View your Apple Music songs by theme.

Listing your songs from the Apple Music library.

Module Player

- Possibility to read media.
- Possibility of adding to favorites.
- Possibility to read the daily statistical step counter.
